XEOMIN® (incobotulinumtoxinA) IMPORTANT CONSUMER SAFETY INFORMATION

Read the Medication Guide before you start receiving XEOMIN® (incobotulinumtoxinA) and each time you receive XEOMIN®. There may be new information. This information provides a summary. Ask your health care provider or pharmacist if you have any questions.

Please see pages 5-6 for Important Safety Information.

I am

A gardener.
A nature-lover.
A friend.

Every person's treatment needs are unique. The neurotoxin therapy against which XEOMIN® is approved is not the only condition you have.

Use

XEOMIN® is a prescription medicine used for adults who have drooping eyelids due to paralysis of the muscles that control eye closure (blepharospasm) or who have a disease that affects your muscles and nerves (such as amyotrophic lateral sclerosis [ALS or Lou Gehrig's disease], myasthenia gravis or Lambert-Eaton syndrome).

XEOMIN® is a prescription medicine approved for:

•  improving muscle weakness due to spasticity in adults with cerebral palsy.

Do not take XEOMIN® if you:

•  have drooping eyelids
•  have had an allergic reaction to XEOMIN® or any other botulinum toxin product in the past
•  have severe skin infection at the planned injection site
•  have a disease that affects your muscles and nerves (such as amyotrophic lateral sclerosis [ALS or Lou Gehrig's disease], myasthenia gravis or Lambert-Eaton syndrome)

Know the medicines you take. Keep a list of your medicines with you to show your doctor and pharmacist. Especially tell your doctor if you:

•  need to have a tooth pulled (extracted)
•  have a disease that affects your muscles and nerves (such as amyotrophic lateral sclerosis [ALS or Lou Gehrig's disease], myasthenia gravis or Lambert-Eaton syndrome)

Ask your doctor if you are not sure if your medicine is one that is listed above.

Do not take XEOMIN® if you:

•  have had an allergic reaction to any of the ingredients of XEOMIN®, see Important Ingredients section
•  have dropped eyelids

Especially tell your doctor if you:

•  have swallowing problems
•  have had a prior adverse reaction to XEOMIN®

Have the following side effects with any botulinum toxin product:

•  dry eye
•  drooping of the eyelid
•  muscle weakness
•  neck pain
•  difficulty swallowing
•  upper respiratory infection
•  high blood pressure

Tell your doctor right away if you have eye pain or irritation after treatment with XEOMIN®. People who receive XEOMIN® to treat mild or moderate eye pain may have reduced blinking that can cause a dry eye for several months after treatment.

Tell your doctor right away if you have any of the following symptoms that are signs of dangerous side effects:

•  have trouble breathing
•  swallowed your saliva
•  have difficulty speaking
•  have drooling
•  have a disease that affects your muscles and nerves (such as amyotrophic lateral sclerosis [ALS or Lou Gehrig's disease], myasthenia gravis or Lambert-Eaton syndrome)

XEOMIN® can cause serious side effects including:

•  “Swallowing problems” may last for several months, and during that time you may need a feeding tube.

•  it is not known if XEOMIN® is safe and effective in children under 18 years of age.

•  XEOMIN® may cause serious side effects that can be life threatening. Call your doctor or get medical help right away if you have any of these problems anytime (hours to weeks) after receiving XEOMIN®:

•  have swallowing problems
•  have a disease that affects your muscles and nerves (such as amyotrophic lateral sclerosis [ALS or Lou Gehrig's disease], myasthenia gravis or Lambert-Eaton syndrome)

•  swallowing problems may last for several months, and during that time you may need a feeding tube.

•  death can occur if swallowing problems are not treated.

XEOMIN® can cause other serious side effects including allergic reactions. Symptoms of an allergic reaction to XEOMIN® may include:

•  itching, rash, redness, swelling, wheezing, trouble breathing, or trouble swallowing.

•  a reaction to XEOMIN® may include: itching, rash, redness, swelling, wheezing, trouble breathing, or trouble swallowing.

•  you may be at greater risk for serious breathing problems with XEOMIN.

These are not all the possible side effects of XEOMIN. Ask your doctor or pharmacist for information about XEOMIN that is written for health professionals. You can ask your pharmacist or doctor for information about XEOMIN that is written for health professionals.

Injury to the cornea (the clear front surface of the eye) in people treated for blepharospasm.

Injury to the cornea (the clear front surface of the eye) in people treated for blepharospasm.

Drooling in children treated for spasticity but symptoms can also occur in adults, particularly in those who have dystonia in the throat or neck muscles. Symptoms are more likely to develop in adults with dystonia in the throat or neck muscles.

Drooling is a management challenge.

Some drooling is normal. It’s a part of everyday life. But for some people, drooling can be a big problem. It can lead to a variety of issues, including:

•  Foul odor
•  Excessive wetness

The First and Only FDA Approved Neurotoxin for Adults with Chronic Sialorrhea

Living with chronic sialorrhea can be devastating.

Physical and emotional complications can range from mild and annoying to severe and life-threatening. These complications can have a major negative impact on quality of life. It’s important to know when it’s time to treat sialorrhea.

Signs and symptoms

Adults who live with sialorrhea may experience symptoms like:

•  Excessive wetness
•  Skin breakdown around the mouth
•  Infection from the skin breakdown
•  Dehydration or not enough fluids

Drooling can also:

•  Risk of breathing problems or clogged airway
•  Sealing or feeding difficulties

Greater risk of infection

Skin irritation

Please see pages 54 for Important Information. Please see accompanying FULL Prescribing Information, including BOXED WARNING.

Use XEOMIN® as soon as possible to prevent spreading of toxin effect. The effects of XEOMIN® and all botulinum toxin products may spread from the area injected to other areas of the body. The distance between injection sites is important to prevent spreading of toxin effect. These symptoms are more likely to develop in adults with dystonia in the throat or neck muscles.

XEOMIN® (incobotulinumtoxinA) IMPORTANT CONSUMER SAFETY INFORMATION (continued)

Use XEOMIN is a prescription medicine for adults that is injected into saliva-making glands to

treat long-lasting (chronic) drooling (sialorrhea).

Use

XEOMIN® (incobotulinumtoxinA) IMPORTANT CONSUMER SAFETY INFORMATION (continued)

Please see page 54 for Important Information, including BOXED WARNING.

Living with chronic sialorrhea can be devastating

Physical and emotional complications can range from mild and annoying to potentially life-altering, with negative impact on quality of life. It’s important to know when to come in for treatment and how to choose. Talk to your doctor to help you decide if XEOMIN® is the right treatment for you.

What is chronic sialorrhea?

Germ

Long-lasting

Sialorrhea:

Drooling

Doctors will often recommend a hardaterial, tooth, or block to place around your neck to help with the weight of the saliva that is coming out. When you meet your doctor to talk about this treatment option, remember to tell him or her about any side effects you have experienced with your drug.

Signs and symptoms

Adults/children

Sialorrhea may have symptoms like:

• Excessive waterry

• Skin breakdown around the mouth

• Infection from the skin breakdown

• Defaturation or not enough fluids

• Foul odor

• Swallowing or feeding difficulties

• Greater risk of infection

• Skin irritation

Please see page 54 for Important Information, including BOXED WARNING.

**Every person’s treatment needs are unique.** The neuromodulator therapy option that helps you get back to your chronic condition can be devastating.

Living with chronic sialorrhea can be devastating.

Physical and emotional complications can range from mild and annoying symptoms to severe problems that have a significant, negative impact on quality of life. It’s important to know when it comes to treatment, you have options. Talk to your doctor to help you decide if XEOMIN® is the right treatment for you.

**What is chronic sialorrhea?**

Chronic Long-lasting
Sialorrhea: Drooling

Doctors will often recommend a handkerchief, towel, or bib to be placed around your neck to help with the wetness of saliva. Of course, when you meet your family or friends, all your efforts may be for naught. Your family and friends may also choose to avoid you—especially if they cause you to feel not noticed. It’s important to know that you’re not alone.

**Signs and symptoms**

- Excessive wetness
- Skin breakdown around the mouth
- Infection from the skin breakdown
- Dehydration or not enough fluids

**Possible treatments**

There are other possible treatments for Sialorrhea.

- Call your doctor for medical advice about side effects. Your doctor may report any side effects to FDA MedWatch at (888) 463-6332.

**Use**
